

Berlin Mapathon

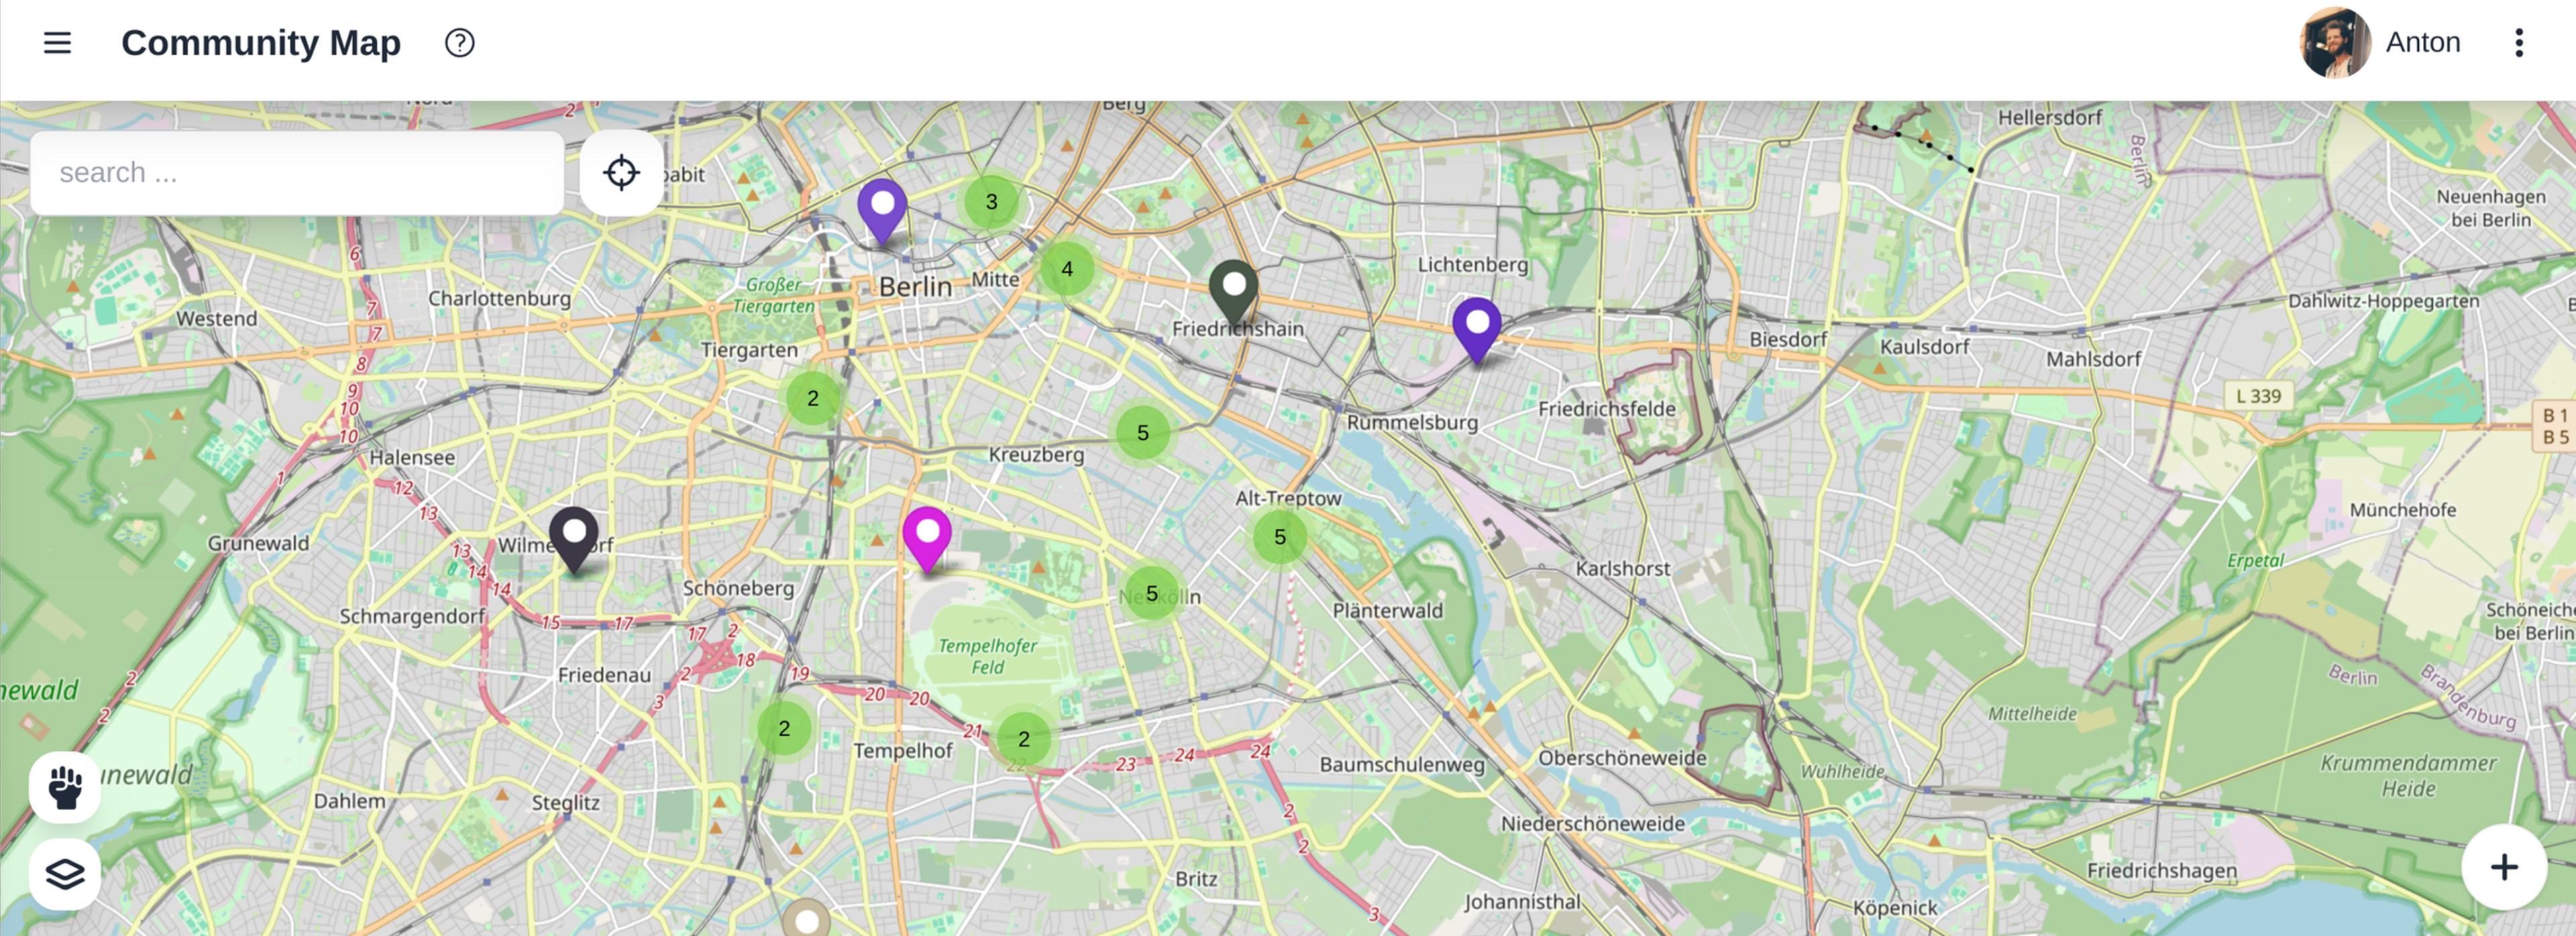

🌟 7-day Mapping Challenge 🌟

MOOS & The Y Berlin: Code 2 Community

Berlin Mapathon is a  7-day Mapping Challenge A photograph showing a group of approximately 20 people sitting around a long wooden table, eating a meal together. They are using plates and cutlery. There are several large blue bottles on the table. In the background, there are brick buildings and some greenery.

Mapathon is a collaboration of several projects that were part of the Code 2 Community hackaton, like the  Community Ecosystem Map

By organising a 7 Day-Mapping Challenge we want to...

... Make new Friends! 🎉 We want to onboard new projects from the area of Berlin on the Community Map eg.

- Co-Working & Co-Living Spaces 
- Social & Regenerative Startups 
- NGOs 
- Communities 
- Urban Gardening 
- Culture & Art 

By organising a 7 Day-Mapping Challenge we want to...

... Deploy a memorable, fun, creative, educative experience for participants, largely being Moos Community & Friends:

- Regenerative & activist organisations 
- Healing practices & natural food 
- Small businesses 
- Creatives 
- Web 3 projects 

“The ability to self-organise is the strongest form of system resilience.”

- Donella Meadows

There are three parts to Berlin Mapathon:

THEORETICAL

**presentations,
discussions
& workshops**

PRACTICAL

**field game with
daily recups &
prizes**

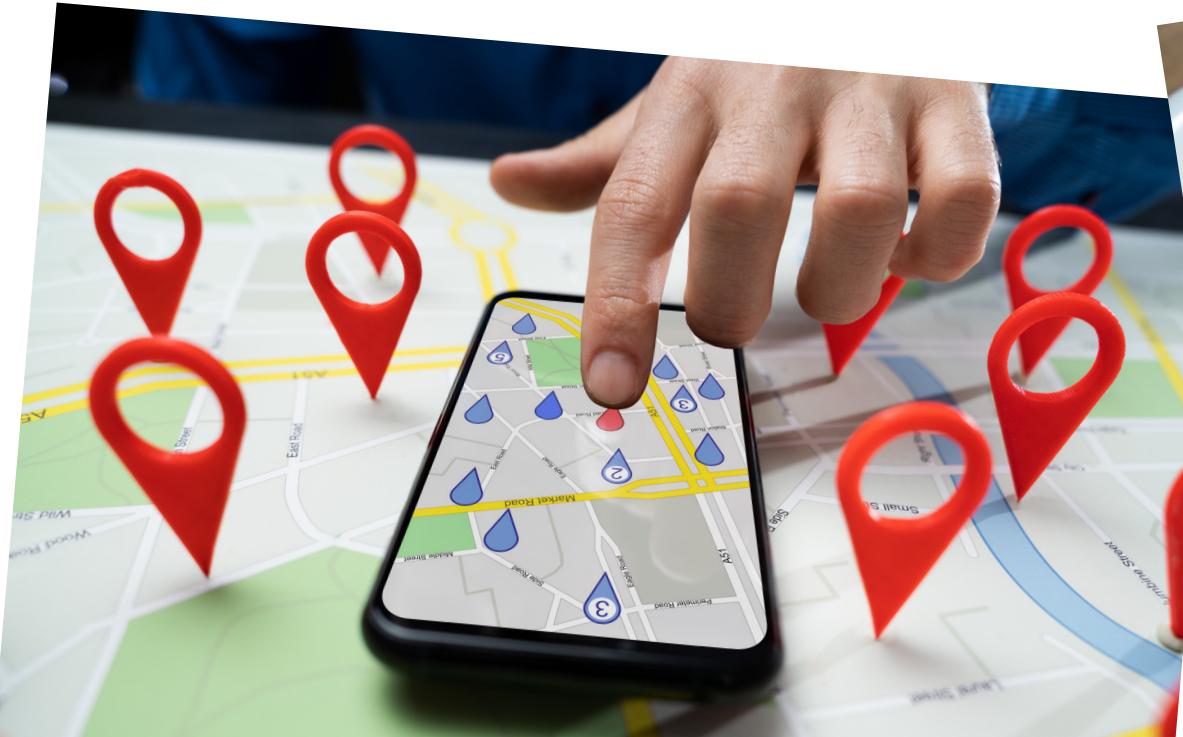

TECHNICAL

**Ecosystem
Community Map
improvements**

✍ THEORETICAL PART: presentations, discussions & workshops

- Different fields and aspects of mapping, tooling
- Best practices of geographic and thematic mapping
- Workshops on team-play and creative cocreation
- Talks about self-organisation

PRACTICAL PART: field game with daily recups & prizes

- **Gamification!** Team up and compete with other teams to win prizes
- Explore the city during the most lovely season - spring!
- Get in contact with Berlin's best impact projects and people to onboard them into our growing ecosystem

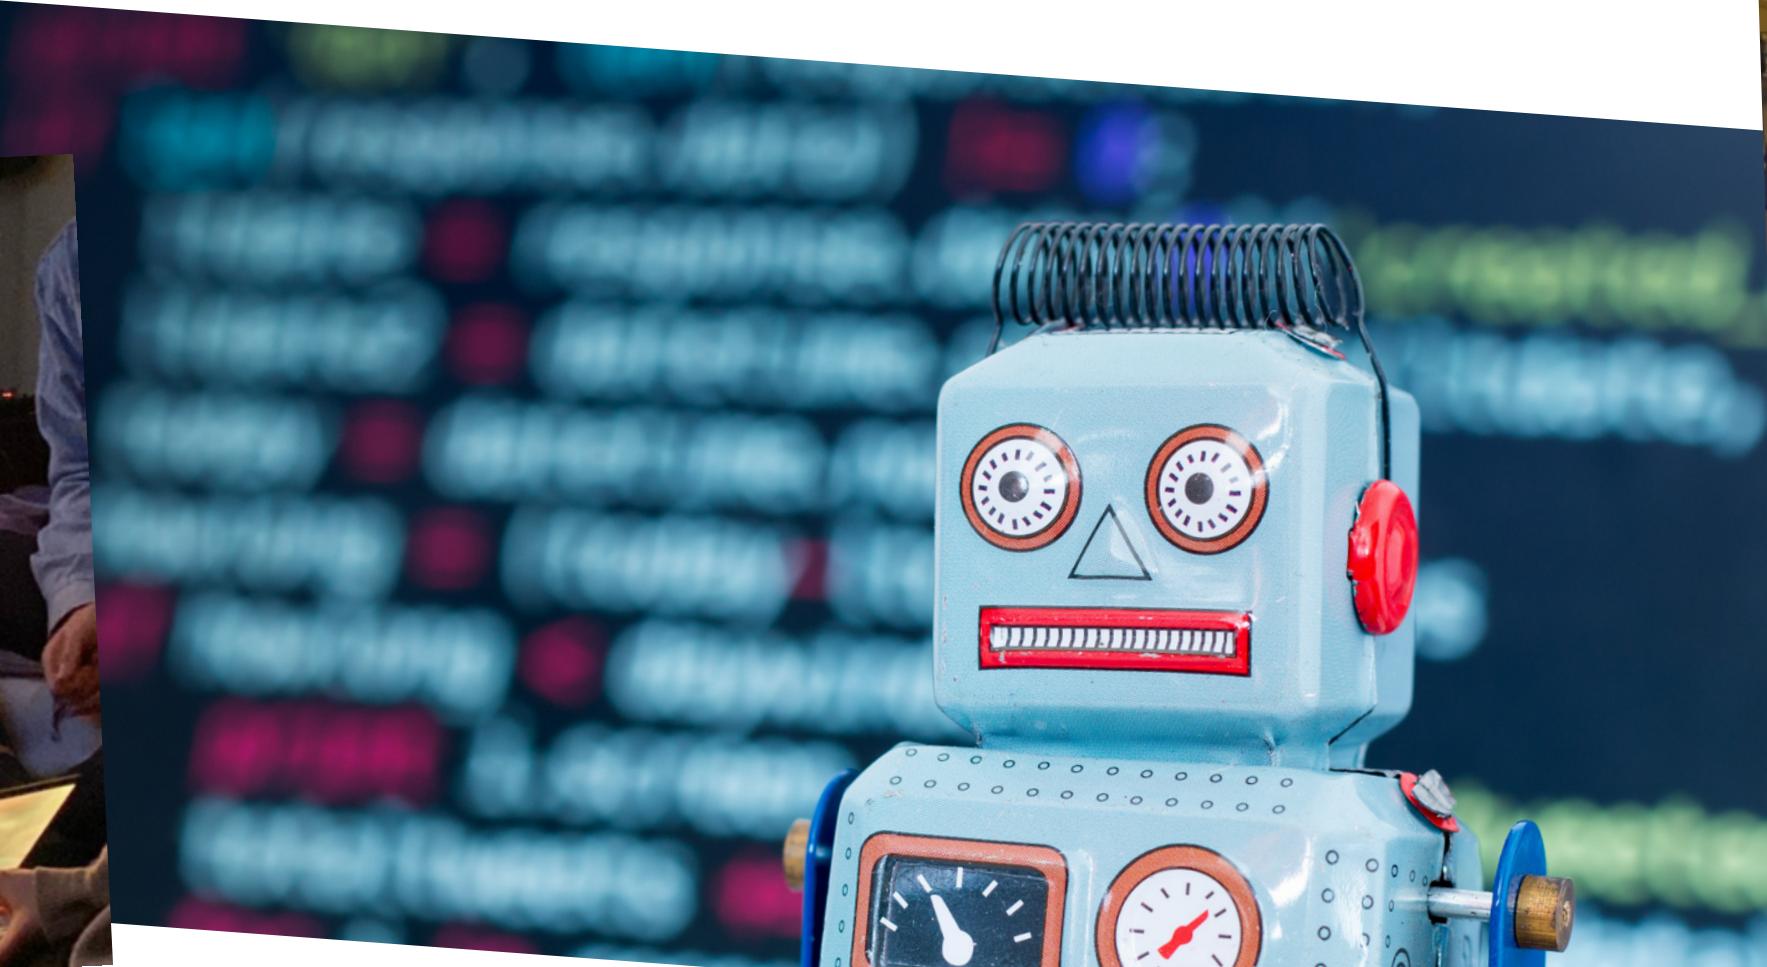

TECHNICAL PART:

Ecosystem Community Map improvements

- Development and enhancement of our tools and data structures, with a special focus on open data and data interoperability
- Implementing of tokenomics and gamification

What will be the signs that we've made it?

If we are successful there will be three signs:

1. Community is growing in real life and actively adding their profiles, places, projects and events to the map.
2. We engage more software developers and contributors of all kind in community mapping.
3. People in our community are leaving their bubbles and screens. They have more meaningful and nurturing in-person encounters and start actively shaping their collective future.

“We are the ones we’ve been waiting for.”

- Hopi proverb
